

Tutorial 3d CSS Properties (2)

Objective

The objective of this tutorial is to test your understanding about CSS especially in the aspect of *CSS Properties*

Preparing the Tutorial Material

Before starting this tutorial, prepare the require file. Follow the steps below:

1. Create new folder (either on you r *desktop* or your *pendrive*)
2. Download “*Tutorial 3c – Material*” and save in the *folder* you have created.
3. Extract the file in the same folder.

Question

By using the Textpad, write HTML document to produce the pages below. Use the *template file* provided. Presentation for each page must use the CSS. The outcome of the display is shown in the output.pdf file. If you have forgotten, you can refer to the previous tutorial (especially Tutorial 3b). You are also provided with some answer section as guideline. Type in the shaded part in the related file and complete the file.

1. File: **T3d-1.html**

Define back the *styles* for the *hyperlinks* as follow:

Hyperlinks:

Color: green
Font: verdana, 10 pt
Bold

Active Links:

The font size of the link becomes two time bigger

Visited Links:

The link color is changed to lightgrey

Hovering Link:

The link color is changed to red.

Answer Section T3d-1.html

You only provided with part of the answer of the code. The rest of the code, do it on your own.

```
<style type="text/css">
```

```
  a:link {font-family: verdana;  
          font-size: 10pt;}
```

```
</style>
```

2. File: T3d-2.html

The image shows a web form with three elements: a label "Search for ID", a text field with placeholder "<TYPE ID HERE>", and a button with a search icon and the text "Start". Arrows point from labels (a), (b), and (c) to these elements respectively.

a) **Label text “Search for ID”**

Font: verdana, 10 pt

Text: Underline and Bold

b) **Text Field**

Background: lightgrey

Text: Bold and always in UPPERCASE

c) **Button with icon**

Text: Bold, Italic and green in color

Image: search.gif

Answer Section T3d-2.html

You only provided with part of the answer of the code. The rest of the code, do it on your own.

```
<body>

<span style="font-family:verdana;
           font-size:10pt;
           text-decoration:underline;
           font-weight:bold;">
Search for ID </span>

&nbsp;

<input type="text" value="<type id here>"
       size="25" style="font-weight:bold;
       text-transform:uppercase;">

&nbsp;

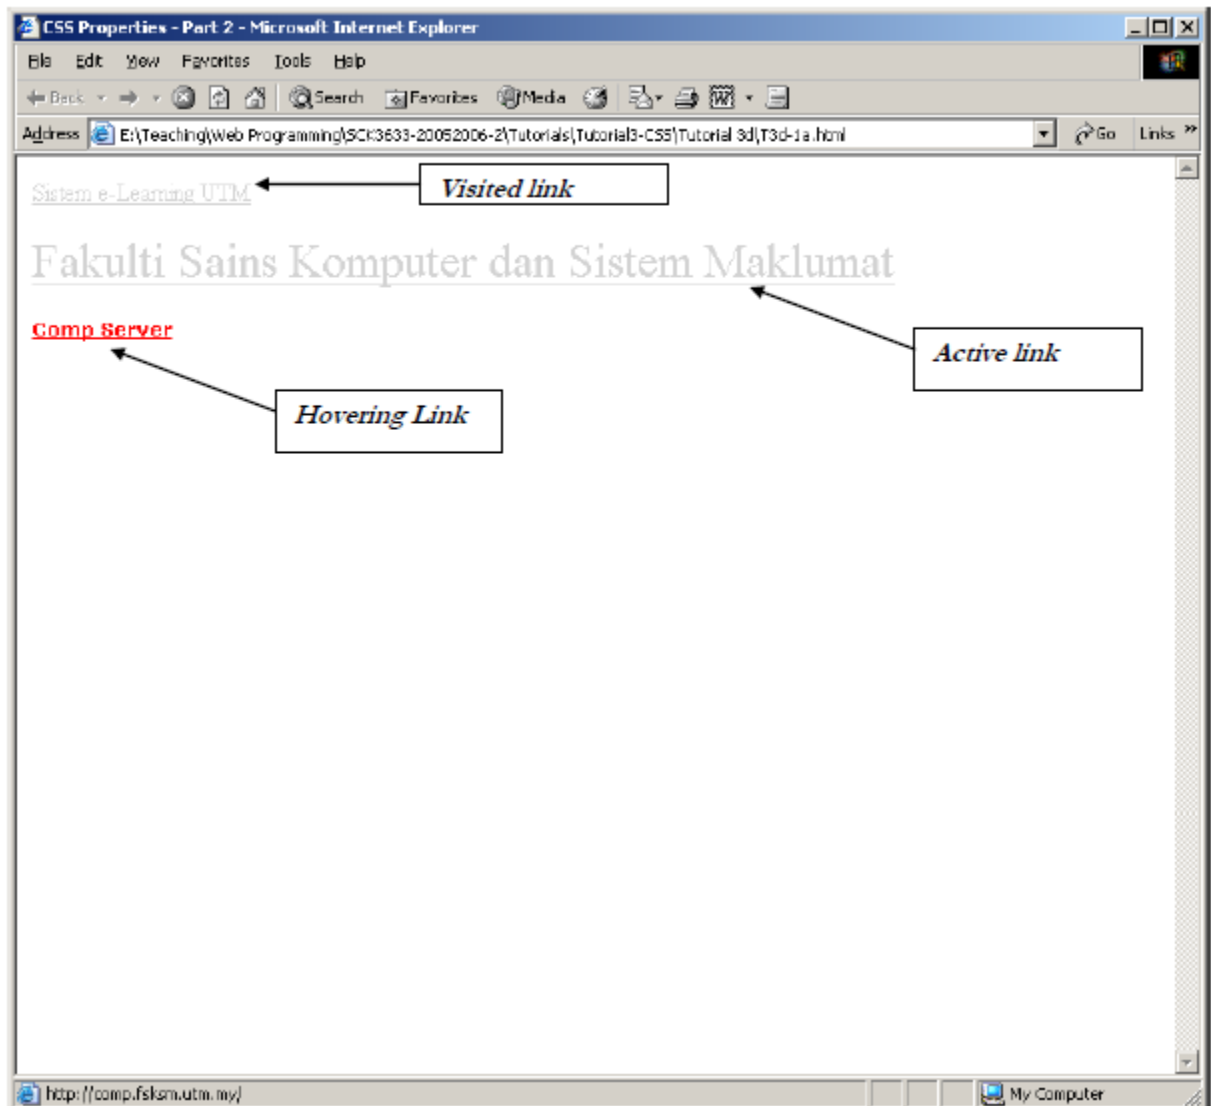

<input type="button" value="Start "
       style="text-align:right;
       vertical-align:middle;
       width : 90px;
       height: 35px;">

</body>
```

3. File: T3d-3.html

Edit the file T3d-3.html that provided to produce the outcome as the tale that shown in the **output.pdf** file. *Styles* for the document also are explained in the related document.

Output: T3d-1.html

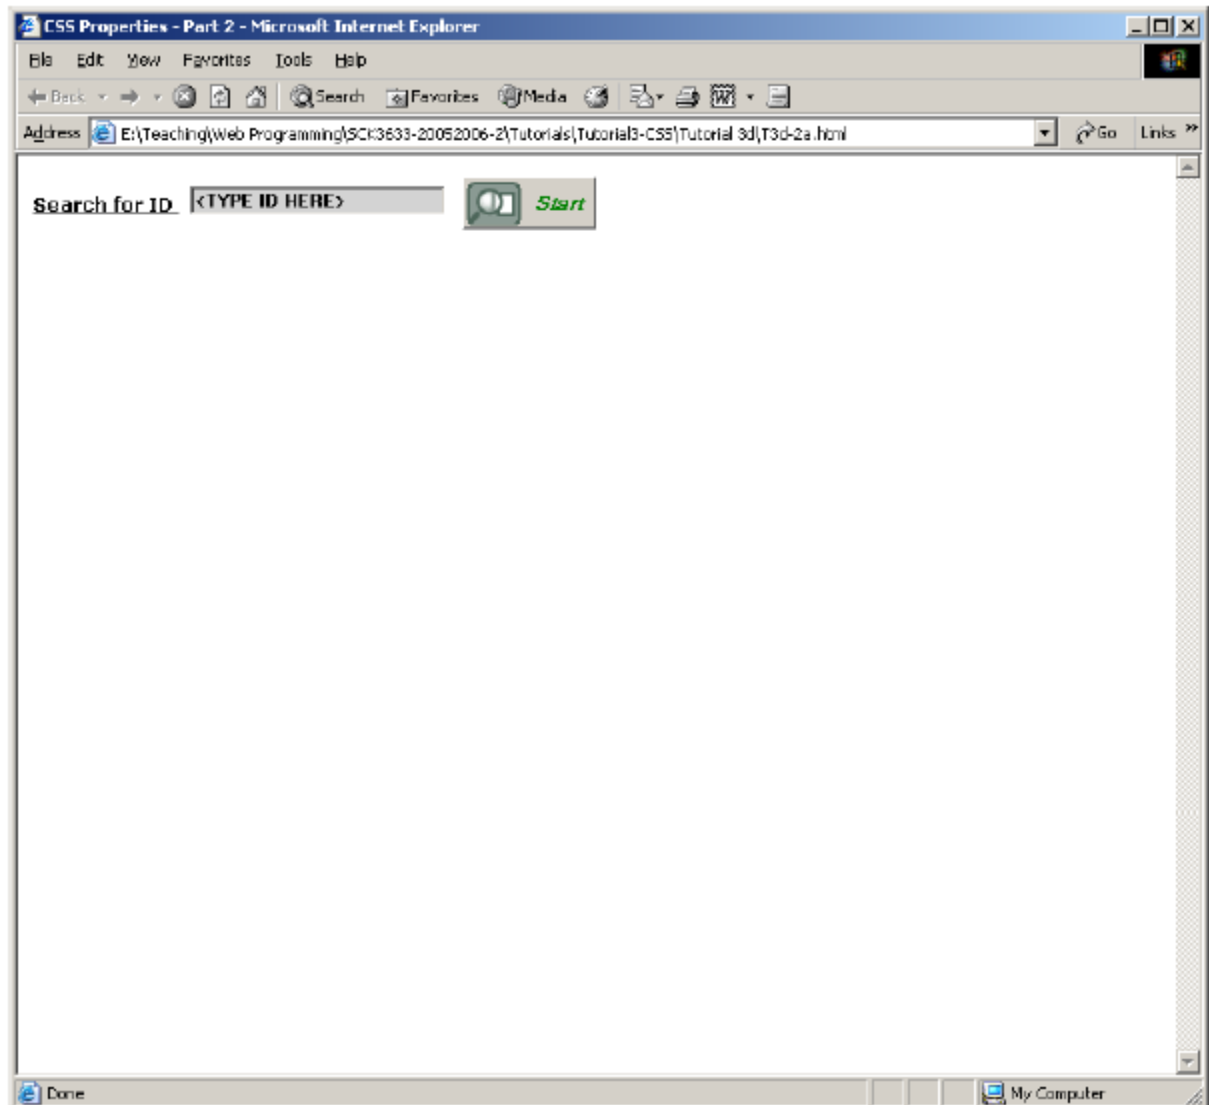

Note:

Change *Fakulti Sains Komputer dan Sistem Maklumat* to Faculty of Computing (link to <http://comp.utm.my/>).

Change the words *Comp Server* to Web Programming Website (link to http://gmm.fsksm.utm.my/~sarina/wp_section05/)

Output: T3d-2.html

Output: T3d-3.html
